

Rivers (Lewis Clark)

What has happened to all our rivers
The thought of it gives me shivers
I remember seeing them flowing freely
But now they are clogged up and dirty and dreary

Its 2050 now and don't you know
The world has messed up big and rivers don't flow
We polluted them big time and didn't think
We wouldn't have enough to drink

Its not as if we weren't told
By some who then we thought were bold
Why didn't we listen and take heed
Before all the rivers ended up dead
